Sample API Response

Sample Success Response:

```
{ "Status": "SUCCESS", "Response": "SUCCESS" }
```

Sample Failure Response:

```
{ "Status": "FAIL", "Response": "Invalid PIN"}
```

Integration Guidelines

1. Always use HTTP GET or POST as per API Method.
2. MSISDN must be in full international format (e.g., 9715XXXXXXX).
3. click_id should remain consistent across both API calls.
4. Macros correspond to real-time dynamic values.
5. Avoid retrying failed PIN validations more than 3 times.
6. Redirect to the offer's portal URL after success.
7. Log all API requests and responses for debugging.
8. Ensure callback and portal URLs are whitelisted.
